

## REMARKS

Claims 1,2,4,5, and 7 are pending in the application. Claims 1,4 and 7 has been amended. Claim 2 has been cancelled. Claim 5 is original.

The Examiner objected to claim 1 as insufficient antecedent basis for "the open end of the cup", since claim 1 has been currently amended as suggested by the Examiner to read: "a cup for light reflection, having an open end." It is believed that claim 1 is no longer objected.

The Examiner rejected claims 1,5 and 7 under 35 U.S.C. 102(b) as been anticipated by Zhang (U.S. Pat. Pub. 2002/0136025). Zhang discloses metals 311 radially arranged from the center of the cup opening to form fan-out windows, and each metals has an L-shaped terminal end in the center for mounting single LED chip. While the present invention discloses horizontal parallel metal plates and vertical parallel metal plates to form rectangular windows. A plurality of cross points are formed by the orthogonal metal plates. Each of the cross points is suitable for mounting at least one LED chip. Zhang teaches away to form multiple cross points with parallel orthogonal metals suitable for mounting a plurality of LED chips thereon.

By amending claim 1 to read as: a ridged metal grid formed with a first set of parallel horizontal metal plates and a second set of parallel vertical metal plates, and a plurality of cross points formed by the two set of metal plates; and more than one of said cross points, each being mounted at least one light emitting device facing to the cup. It is believed that claim 1 is no longer anticipated by Zhang. Claims 5 and 7 are directly or indirectly dependent on claim 1, since claim 1 has been amended to be patentable, dependent claims 5 and 7 are believed no longer unpatentable.

The Examiner rejected claims 2 and 4 under 35 U.S.C. 103(a) as being unpatentable over Zhang. Claim 2 has been cancelled. Since claim 1 has been amended to be patentable, dependent claim 4 is believed to be no longer unpatentable.

In view of the above, it is submitted that claims 1 as currently amended, and claims 4,5 and 7 are directly or indirectly dependent on claim 1, are all in condition for allowance. Reexamination of the objections and rejections is requested. Allowance of claims 1,4,5,and 7 at an early dated is solicited.

Respectfully submitted,

*Hung Chang Lin*
